future service

CARE AND MAINTENANCE of your composite rigging has always been vitally important and regular servicing will undoubtedly maximise performance, longevity and reduce your total cost of ownership.

So, as part of your winter routine,
why not take the opportunity to start the new season with fully serviced rigging?

Or, spend a little extra and upgrade your rigging package!
In the process, you can avoid any disruption to your summer sailing programme,
start the season with the latest technology and have total peace of mind for those early trips or regattas.

benefits

- ✓ Start next season with peace of mind and confidence in your equipment
- ✓ Increase cable reliability
- ✓ Avoid downtime during the sailing season
- ✓ Save costs with preventative maintenance
- ✓ Minimise service costs by booking early and scheduling in advance
