

PROJECT MANAGER

Future Fibres is the market leader in carbon fibre rigging products for yachting. As part of the wider North Technology group, we are at the forefront of technology in the performance marine industry.

We are looking for an enthusiastic Project Manager to ensure customer satisfaction. The project manager is responsible for receiving rigging orders (projects) from the sales team, and ensuring that they are designed, manufactured, and delivered to the customer on time, in budget, and at the correct level of quality.

The Project Management role at Future Fibres is key to the success of the business. PM's work throughout the business, with the sales team, the purchasing team, the production team, and the senior management team.

MAIN RESPONSABILITIES

- Managing a variety of customer projects.
- Coordinating internal resources and third parties/vendors for the flawless execution of projects.
- Ensuring that all projects are delivered on-time, within scope and within budget.
- Managing the relationship with the client and all stakeholders.
- Ensuring resource availability and allocation.
- Developing a detailed project plan to monitor and track progress.
- Managing changes to the project scope, project schedule, and project costs using appropriate verification techniques.
- Measuring project performance using appropriate tools and techniques.
- Reporting and escalating quality, resource, time, and cost issues to management as needed.
- Performing risk management to minimize project risks.
- Creating and maintaining comprehensive project documentation.
- Assisting QC at quality control of project, or in absence of QC be able to perform quality control independent.

WHAT WE NEED FROM YOU

- Mechanical, aeronautical, or naval engineer experience.
- Working experience in project management in the technical sector.
- Excellent written and verbal communication English skills.
- Working knowledge of CAD/CAM.
- Great interpersonal skills, needing to motivate and maintain relationships in varying circumstances.
- Independent, pro-active, problem solver, and innovative.
- Hands-on experience with composite manufacturing will be valuable.
- Ability to balance short term needs with longer term project planning.
- Sailor or worked within the marine industry will be a plus.

WHAT WE OFFER

- Developing your career in a company that is at the forefront of its industry.
- Permanent contract.
- Full time position.
- Learning every day from the best team in its area.
- The possibility to travel occasionally to manufacturing sites.
